EDUCATION

2013 - 2018
STI COLLEGE STA CRUZ
• BS Computer Engineering

SKILLS

- Requirements Analysis
- Time Management
- Mentoring & Knowledge Sharing
- Effective Communication
- Logical Thinking
- Problem Solving
- Code Review
- Cross-functional Collaboration

TECHNICAL SKILLS

- Flutter
- Unit testing
- Kotlin
- CI/CD
- Firebase
- GraphQL
- Auth0
- Shopify
- Payment Gateway integrations
- Hubspot
- Android Development
- Clean Architecture Implementation
- Code Quality Optimization
- System Design & Architecture

PROFILE SUMMARY

Mobile Software Engineer with 7 years of experience in mobile app development, currently serving as a Senior Mobile Developer. I lead mobile development efforts while closely collaborating with backend and AI engineers to integrate complex business logic and AI-driven features into scalable, secure applications. In addition to my full-time role, I've successfully delivered two client projects through 3 years of part-time freelancing. I'm passionate about clean architecture, code quality, and maintainable project structures. I bring a leadership mindset to mobile engineering, guiding teams in building scalable codebases that grow with business needs. My foundational studies in AI development have helped me better bridge the gap between frontend user experiences and AI-powered capabilities. A strong believer in collaboration, I value team input and foster a culture of shared ownership and technical excellence.

WORK EXPERIENCE

Maya SEPT 2025 - PRESENT
Senior Mobile Engineer

- Build and maintain common modules, shared SDKs, reusable UI components, and internal tools.
- Mentoring junior developers
- Keep updated on mobile trends with Flutter, Android and iOS updates and help evolve Maya's mobile development standards and practices.

PropHero JUN 2023 - AUG 2025
Mobile Software Engineer

- Led architectural improvements by implementing Clean Architecture principles, resulting in a 40% reduction in code complexity and improved maintainability
- Engineered a reusable checklist feature utilizing clean architecture patterns, enabling rapid feature development and reducing implementation time by 60%
- Enhanced mobile app performance and user experience:
- Optimized app responsiveness, improving load times by 30%
- Implemented deep linking functionality for seamless user navigation
- Integrated push notification system with 98% delivery success rate
- Developed interactive data visualization features using graphs and charts
- Streamlined development workflow
- Restructured and organized codebase following SOLID principles
- Improved routing system for better navigation and state management
- Achieved 85% unit test coverage, reducing production bugs by 40%
- Fostered strong collaboration between frontend and backend teams
- Integrated Hubspot platform in the app for easy communication with the users by creating and using method channel to communicate both in android and ios native.
- Integrated an AI agent created by our Data Engineer using websocket
- Used golden tests for Flutter widgets and UI testing
- Helped the Product Manager to improve the team and delivery process
- Integrated Shorebird for easy Deployment and and patching changes directly to prod builds

Arena Sports - UK based app (Part-time) DEC 2024 - MAR 2025

Mobile Software Engineer - Flutter

- Lead the development and implements a clean architecture and maintainable codebase for a short period of time
- Collaborate with designer, Backend and PM to implement a better app UI/UX
- Integrated Stripe payment gateway
- Deployed the app in stores

ShopSuki (Part time)

DEC 2022 - FEB 2025

Mobile Software Engineer - Flutter

- Revamped and Develop from scratch their mobile app ShopSuki
- Implemented some of the code standards for the app.
- Implemented GraphQL and Shopify via Rest API.
- Implemented BoostCommerce in the app using Rest API

PDAX

2022 - 2023

Flutter Engineer

- Developed the CaaS Admin Console for PDAX, enabling Ops and Finance to manage user accounts, generate reports, and configure settings.
- Implemented balance correction features for user transactions.
- Enabled/disabled trading and fiat/crypto transactions.
- Created transaction viewing screens and managed CI/CD for deployment.
- Assisted the PDAX Mobile Team with feature development.

STRATPOINT GLOBAL OUTSOURCING INC.

2019 - 2022

Mobile Software Engineer

Software Engineer IV - GOMO App - Flutter

- Pioneered the revamp of the GOMO PH.
- Developed and integrated an E-commerce feature. And Trained as a team lead.
- Guide and review my teammate's merge request. Assigned to deploy the application in production and Attends Feature Refinements.
- Maintain and updates App's Unit Tests every time there's a code changes.
- Designs a modular class that can be reused by others for other features/screen.

Software Engineer - Globe at Home App - Android

- Assigned to present the features developed by our team.
- Created a Post Analytics feature and KYC Form and improved the App Pin Code.
- Developed and implemented an Anniversary Feature mini game "Find the Duck" and Christmas Event Feature "Hohohome".
